| **Session 2 - Logic and Databases** |  |
| Magic Functions: A Technique to Optimize Extended Datalog Recursive Programs | 21 |
| G Gardarin |  |
| Optimization of Systems of Algebraic Equations for Evaluating Datalog Queries | 31 |
| S Ceri and L Tanca |  |
| Recursive Strategies for Answering Recursive Queries - The RQA/FQI Strategy | 43 |
| W Nejdl |  |

| **Session 3 - Theoretical Issues** |  |
| Using Design Axioms and Topology to Model Database Semantics | 51 |
| A Siebes and M Kersten |  |
| Integrity Checking in Deductive Databases | 61 |
| R Kowalski, F Sadri and P Soper |  |
| The Theory of Probabilistic Databases | 71 |
| R Cavallo and M Pittarelli |  |

| **Session 4 - Panel Session** |  |
| KBMS: How to Implement Them? |  |

| **Session 5 - Data Models and Languages** |  |
| The POSTGRES Data Model | 83 |
| L Rowe and M Stonebraker |  |
| FAD, A Powerful and Simple Database Language | 97 |
| F Bancilhon, T Briggs, S Khoshafian and P Valduriez |  |
| Object-Oriented Specification of Databases: an Algebraic Approach | 107 |
| A Sernadas, C Sernadas and H-D Ehrich |  |
Session 6 - Implementation and Optimisation

Constructing Database Systems in a Persistent Environment
R Cooper, M Atkinson, A Dearle and D Abderrahmane

Incremental Reorganization of Relational Databases
V Markowitz and J Makowsky

Supporting Flat Relations by a Nested Relational Kernel
M Scholl, H-B Paul and H-J Schek

Session 7 - Dependency Theory

On the Satisfiability of Dependency Constraints in Entity-Relationship Schemata
M Lenzerini and P Nobili

Dependency Inference
H Mannila and K-J Raiha

Independent Database Schemes under Functional and Inclusion Dependencies
P Atzeni and E Chan

Session 8 - Temporal Issues

Providing Time-Related Constraints for Conventional Database Systems
T Abbod, K Brown and H Noble

Dealing with Temporal Schema Anomalies in History Databases
N Martin, S Navathe and R Ahmed

Behaviour Management in Database Applications
J-Y Lingat, P Nobecourt and C Rolland

Session 9 - Query Processing

Of Nests and Trees: A Unified Approach to Processing Queries That Contain Nested Subqueries, Aggregates, and Quantifiers
U Dayal

A Comparison of Self-Contained and Embedded Database Languages
A Christensen and T Zahle

Preferences: Putting more Knowledge into Queries
M Lacroix and P Lavency

Session 10 - Panel Session

What makes Object-Oriented Databases Different?

Session 11 - Query Transformations

A Source-to-Source Meta-Translation System for Relational Query Languages
D Howells, N Fiddian and W Gray

Translating and Optimizing SQL Queries Having Aggregates
G von Bulzingsloewen
Query Transformation for PSJ-queries

H Yang and P-A Larson

Session 12 - Recursive Query Processing

Direct Algorithms for Computing the Transitive Closure of Database Relations
R Agrawal and H Jagadish

New Strategies for Computing the Transitive Closure of a Database Relation
H Lu

An Extended Disjunctive Normal Form Approach for Optimizing Recursive Logic Queries in Loosely Coupled Environments
K-Y Whang and S Navathe

STREAM 2

Session 1 - Storage Management

The Design of the POSTGRES Storage System
M Stonebraker

Index Access with a Finite Buffer
G Sacco

A New Compression Method with Fast Searching on Large Databases
J Li, D Rotem and H Wong

Session 2 - Panel Session
How will Hardware Technology Change the Database Environment?

Session 3 - Multimedia Information Management

Multimedia Information Management in an Object-Oriented Database System
D Woelk and W Kim

Freeform: A User-Adaptable Form Management System
R King and M Novak

Mind Your Grammar: a New Approach to Modelling Text
G Gonnet and F Tompa

Session 4 - Performance

An Analytical Method for Estimating and Interpreting Query Time
H-Y Hwang and Y-T Yu

Measured Performance of Time Interval Concurrency Control Techniques
J Noe and D Wagner

Query Optimization by Stored Queries
K Subieta and W Rzeczowski

Session 5 - Distributed Systems

Basis of a Partially Informed Distributed Database
M Blakey
Extending Logging for Database Snapshot Refresh
B Kahler and Ø Risnes

Enhancements to the Voting Algorithm
S Jajodia and D Mutchler

Session 6 - Panel Session
Heterogeneous Databases: Past or Future?

Session 7 - Inegrity and Recovery

Masking System Crashes in Database Application Programs
J Freytag, F Cristian and B Kahler

Integrity Constraint Reformulation for Efficient Validation
X Qian and D Smith

Log-Based Recovery for Nested Transactions
J Elliot B Moss

Session 8 - Panel Session
Are There Strategic Uses for VLDB?

Session 9 - Engineering Design Databases

PRIMA - a DBMS Prototype Supporting Engineering Applications
T Harder, K Meyer-Wegener, B Mitschang and A Sikeler

DVSS: A Distributed Version Storage Server for CAD Applications
D Ecklund, E Ecklund Jr, R Eifrig and P Tonge

Managing Change in a Computer-Aided Design Database
R Katz and E Chang

Session 10 - System Techniques

Design and Analysis of Integrated Concurrency-Coherency Controls
D Dias, B Iyer, J Robinson and P Yu

Performance Evaluation of an Operating System Transaction Manager
A Kumar and M Stonebraker

Cooperative Object Buffer Management in the Advanced Information Management Prototype
K Kuspert, P Dadam and J Gunauer

Session 11 - Engineering Data Complexities

Expert Database Support for Consistent Dynamic Objects
G Nguyen and D Rieu

A Dual Space Representation for Geometric Data
O Gunther and E Wong

The R+-Tree: A Dynamic Index for Multi-Dimensional Objects
T Sellis, N Roussopoulos and C Faloutsos

Session 12 - Panel Session
Prototyping for Database Design
