LETTER FROM THE EDITORS IN CHIEF

The Proceedings of the VLDB Endowment (PVLDB) provides a high-quality journal publication service to the data management research community. Each volume offers twelve monthly submission deadlines on the first day of each month and a quick, six weeks, reviewing cycle. This publication model was pioneered by PVLDB and combines a journal-style reviewing process, which includes a three-month revision cycle, with the agility and visibility provided by rapid on-line publication, and presentation at the annual VLDB conference.

PVLDB attracts many submissions spanning diverse data management topics, and the PVLDB reviewing process is implemented by a large team of dedicated researchers. The Review Board of PVLDB Volume 12 consists of 166 expert researchers, and reviewing is coordinated by 17 Associate Editors. Review Board members provide timely (within a 4-week deadline) high-quality reviews, and participate actively in online discussions led by the Associate Editors for each paper.

This is the eighth issue of the twelfth volume of the PVLDB. There are eight papers accepted in this issue that will be presented at the 45th International Conference on Very Large Data Bases (VLDB 2019), to be held in Los Angeles, California during August 26 to August 30, 2019.

For the eighth issue of PVLDB Volume 12, the review board has selected contributions proposing advances to topics on data management, such as s-t reliability search over uncertain graphs, parallel graph computing, graph partition and write-back policy design for data store management. This issue also contains papers on advanced data analytics, including fact checking in knowledge graphs, sequence outlier pattern detection and comparison study on order-revealing encryption schemes and secure range-query protocols. We hope that the readers will find the selected papers engaging, and thought provoking. We also hope that the selected papers will provide valuable insights and inspire novel systems contributions and follow-up research.
